# Deploy Microsoft Windows 10 to AMD processor-based systems without altering existing processes

Deploy in roughly equal time

Admins need about the same amount of time to deploy Microsoft® Windows® 10 images for AMD and Intel® processor-powered systems
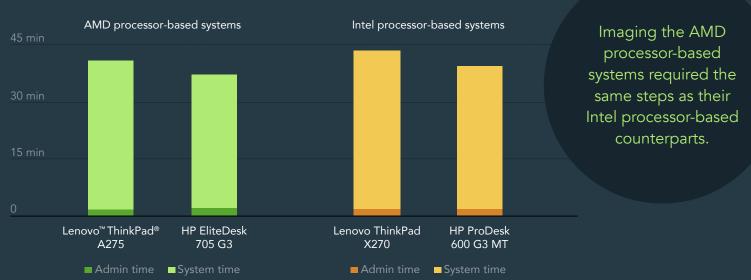

Follow the same steps

Admins complete the same Windows 10 image deployment process for AMD and Intel processor-powered systems

No additional burden on your IT admins.

We found no significant time difference between imaging systems powered by AMD processors and systems powered by Intel processors.

Time to deploy an image to target systems

AMD processor-based systems

Intel processor-based systems
