

Installing MobileXPRT 2015

This document shows how to install MobileXPRT 2015 from Google Play. MobileXPRT 2015 uses a two-stage install and downloads the content for its tests after the installation completes. All screen images came from a Google™ Nexus™ 9.

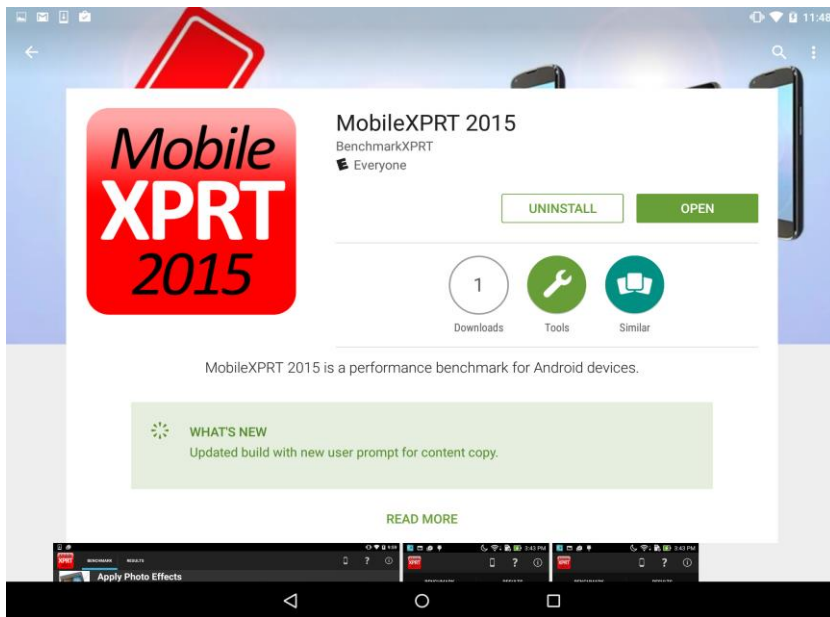

1. To find the app, search for MobileXPRT 2015. On the MobileXPRT 2015 page, click Install.

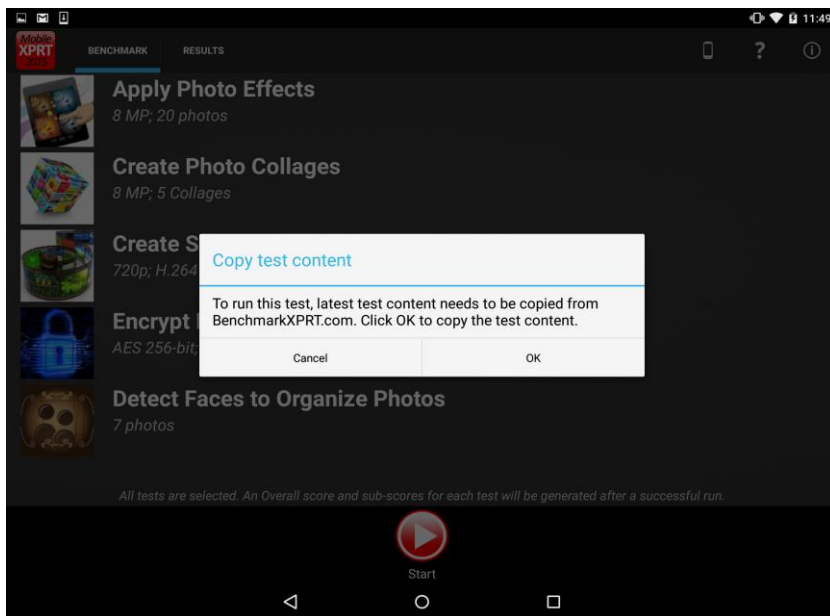

2. You will see a dialog that lets you review the permissions the application needs. Click Accept to proceed.

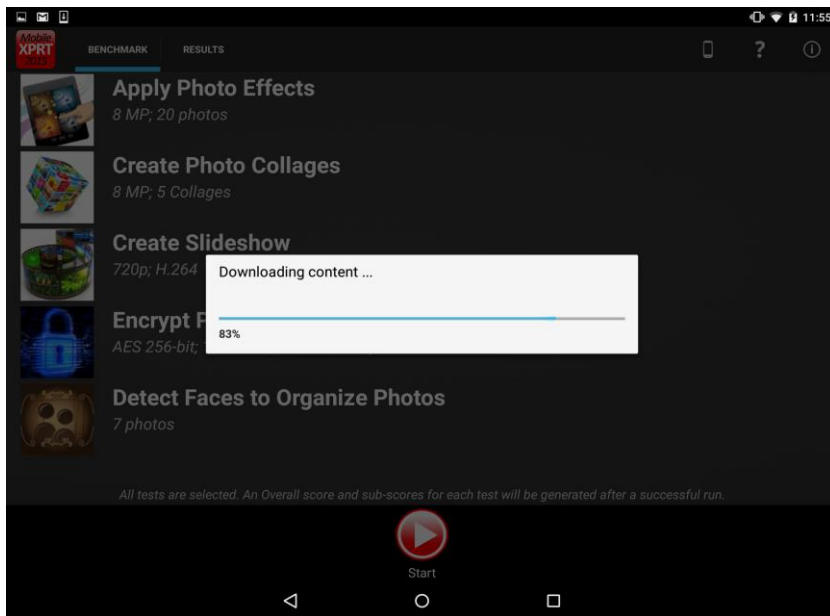

3. After MobileXPRT finishes installing, click Open to launch the application.

4. MobileXPRT will notify you that it needs to copy test content from BenchmarkXPRT.com. Select OK to continue.

5. MobileXPRT downloads and decompresses the content for its tests. The downloading and decompression takes several minutes, but this only needs to be done once. The content is stored locally and all subsequent tests will find it there.

6. When the installation finishes, MobileXPRT 2015 launches automatically.
