Simplify server management tasks and improve security with tools from Dell

We compared capabilities of Dell and HPE server management portfolios. The Dell management portfolio provided more granular control and increased flexibility for administrators, while reducing time and effort to complete common tasks.

Deploy configuration templates in
52% less time
with Dell OME

vs. HPE OneView

Dell offered easier server deployment
OpenManage Enterprise offers one-to-many profile deployment, unlike HPE OneView

Complete system lockdown in
91% less time
with iDRAC9

vs. HPE iLO

Dell offered easier-to-use security features
Integrated Dell Remote Access Controller requires no reboots, unlike HPE iLO

Customize reports with
over 15x the metrics
with Dell CloudIQ for PowerEdge

vs. HPE InfoSight

Dell offered more detailed analytics
CloudIQ offers more performance metric views and customizable reports than HPE InfoSight

The tools we tested:

	Dell solution	HPE solution
Embedded/remote server management	iDRAC	Integrated Lights Out (iLO)
One-to-many device management from a console	OpenManage Enterprise	OneView
Cloud-based management/ monitoring	CloudIQ	InfoSight
