

Bolster your data protection plan with a fast-acting, more robust cyber recovery solution

Based on our research, Dell Technologies PowerProtect Cyber Recovery can offer physical isolation for backup vaults and deeper scanning for ransomware—features Rubrik Security Cloud doesn't offer

“*CyberSense conducts its analysis without requiring the user to perform their own forensics, and the software automates the creation of restore points.*”

“*The Rubrik solution does not enable retention locks by default, and customers must either open a ticket to Rubrik Support or enable a two-person rule to permit retention locks.*”

Physical air gap isolation for backup vaults

Create a physical barrier that data cannot traverse

Deeper scanning for ransomware

CyberSense looks at file and database contents, not just metadata

Scan 2X more anomaly workloads

Search for malware in more places with a single tool

Dell's products are designed to support customers' efforts to secure their critical data. As with any electronic product, data protection, storage and other infrastructure products can experience security vulnerabilities. It is important that customers install security updates as soon as they are made available by Dell.
